

VIFLY Finder 2

User Manual V1.1

GET TO KNOW VIFLY Finder 2

VIFLY Finder 2 is a tiny device to help you locate your lost drone. It is a self-powered buzzer, weighs only 5 grams, beeps loudly over 100 dB. With ViSense technology, VIFLY Finder 2 will beep automatically when main battery is ejected, and keep silence in the night to save power, not disturbing your neighbors.

1. Control Cable Socket
2. Disarm Button
3. LED Light
4. Buzzer
5. Lipo Battery
6. Power Input Indicator

Operation

- **How to Activate:** VIFLY Finder 2 will be activated after main battery is connected.
- **How to Alarm Manually:** While main battery is connected, VIFLY Finder 2 performs like a standard buzzer, but much louder. You can make it alarm by remote controller.
- **How to Alarm Automatically:** With ViSense technology, VIFLY Finder 2 will alarm if main battery is disconnected or out of power, and flash bright blue light if it's dark outside. ViSense will also keep silence in the night to save power, not disturbing your neighbors.
- **How to Disarm:** If you want to end flying, please disarm VIFLY Finder 2. It will beep 3 times when disarmed successfully.
 - **Disarm with disarm button:** Disconnect main battery, hold disarm button on VIFLY Finder for 1 to 5 seconds then release.
 - **Disarm with main battery:** Disconnect main battery, then connect main battery for 3 to 6 seconds and disconnect it again.
- **How to Charge:** When main battery is connected, VIFLY Finder 2 will be charged automatically.

Wiring Diagram

VIFLY Finder 2 supports racing drone flight controller, and airplane receiver.

Connect Flight Controller

Connect Receiver

Specs

Size (L x W x H)	24x13x16 mm
